DIVISION OF RESEARCH AND STATISTICS - Louis Schisa, Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for thecountry as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
August 1982

Civilian Labor Force

The number of New York State residents with jobs declined 68,000 from July 1982 to 7,476,000 in August 1982 or 50,000 less than a year ago.

Total unemployment dropped 15,000 to 685,000 in August 1982. The current jobless level was 114,000 higher than a year ago.

The reduction in unemployment caused the rate of unemployment to decline 0.1 of a percentage point from July 1982 to 8.4 percent in August 1982. Since August 1981, the rate of unemployment has risen 1.3 percentage points.

Nonfarm Employment

Despite some evidence on the national scene of an end to the recession, the job picture in New York State continued to worsen in August 1982. The nonagricultural wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) was down 8,100 over the month to 7,264,400 in August. Over the past 5 years, the State's nonfarm payrolls have recorded an average July-August gain of 23,400.

Manufacturing employment in August 1982 edged upwards 1,900 from July 1982, far below comparable gains averaging 21,800 over the last 5 years. All of the increase occurred in the nondurable goods segment, which added 13,400 jobs over the month. However, the soft-goods advance was nearly 7,000 below average because of less-than-seasonal gains in most industries. The industries experiencing the largest shortfalls were the leather, food, textile, and apparel industries. Soft goods industries with lower job levels in August included the petroleum industry, down seasonally, and the printing industry, which was cutting back newspaper staff.

Durable goods employment slipped by 11,500 in August 1982 as the majority of hard goods industries reacted to recessionary pressures. Job losses in the transportation equipment industry (-4,800) accounted for over 40 percent of the hard goods decline. Most of this decrease followed the shutdown of a downstate automobile assembly plant for retooling to new models, and layoffs in the automotive equipment industry in the western portion of the State. Most of the remaining hard goods industries either fell contraseasonally or experienced greater-than-seasonal job losses. Notable decreases occurred in the nonelectrical machinery (-2,100), stone, clay, glass and concrete (-1,600), and instruments, photo and optical goods (-1,200) industries. Loss of business fostered cutbacks throughout the nonelectrical machinery industry, while a temporary plant shutdown by a nonmetallic mineral product manufacturer caused most of the loss in stone, clay, glass and concrete jobs. All of the decrease in instruments employment occurred because of layoffs of temporary summer help in the photographic industry. Seasonal gains in the furniture (+600) and lumber (+300) industries slightly tempered the above employment losses.

Nonmanufacturing pay rosters in August 1982 dropped 9,900 between July and August 1982, with the largest decrease occurring in the public sector (-7,100). The bulk of the reduction in government employment occurred in the local education portion, which was furloughing nonteaching personnel for the summer. The trade (-6,100) and finance, insurance, and real estate (-1,200) groups also experienced lower job levels in August. Trade employment was down twice as much as usual because of a slowdown in wholesale trade. The finance, insurance and real estate division, which has shown July-August gains in recent years, declined because of sluggishness in the banking and brokerage house industries. The construction (+2,700), services (+1,500), transportation and public utilities (+200), and mining (+100) categories noted below-seasonal job increases. Most of the gain in seasonal hiring was augmented by the termination of several labor-management disputes. The majority the expansion in transportation and public utilities employment occurred in the water transportation segment. The metal mining industry accounted for the rise in mining payrolls.

The comparison with year-ago data revealed that nonfarm employment slipped further below last year's record levels. The August 1982 job count was 66,800 lower than the August 1981 figure. Factory cutbacks accounted for all of the over-the-year loss as payrolls totaled 71,000 less than in August 1981.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

INSURED EMPLOYMENT AND PAYROLLS
FOURTH QUARTER 1981

INSURED EMPLOYMENT AND PAYROLLS
FOURTH QUARTER 1981

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them case remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered bt unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the Federal Amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the Federal Government, New York State and local government units covered for unemployment compensation purposes, are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the Law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or grographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from on location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than on esttablishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates in a single county two or more establishments that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during thee same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the Office of Statistical Standards, Bureau of the Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than 4 reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the State, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New york State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy*. Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
--**Buffalo*. Erie and Niagara counties.
--**Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Statdard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

SOURCE OF DATA. Reports submitted quarterly by employers subject to the new York State Unemployment Insurance Law.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FOURTH QUARTER 1981

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative Federal-State program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "Balance of State" (State less New York City). In these areas, a series of factors are applied to administrative statistics from State unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "Balance of State" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past 4 weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1981 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

[1] Subarea of New York City Area.
[2] Combination of New York City Area and Nassau-Suffolk Area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the Office of Statistical Standards, Bureau of the Budget, Executive Office of the President. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the State. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the State, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and Federal, State, and Local Government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Labor News Memorandum.** Bi-weekly. Newsletter of State and general labor information including bi-weekly strike data, projections of employment and wage data for industries and occupations important in this State.

10. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

11. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

EMPLOYMENT STATISTICS REPORTS

12. **Employment Statistics, Volume 1.** This report contains data on monthly nonfarm employment by industry in New York State from 1939 to 1949. It also contains data on hours and earnings of production workers in manufacturing industries in the State from 1947 to 1949. June 1966.

13. **Employment Statistics, Volume 2.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1959 to 1965. June 1966.

14. **Employment Statistics, Volume 3.** This report contains monthly nonfarm employment data for New York State and New York City from 1950 to 1960 and for the State's industrial areas from 1951 to 1960. It also contains monthly data on hours and earnings of production workers in manufacturing for New York State and New York City from 1950 to 1960. April 1967.

15. **Employment Statistics, Volume 3, Supplement.** Completes the presentations of nonfarm employment, hours and earnings data for the years 1947 to 1960 for the industrial areas of the State. July 1968.

18. **Employment Statistics, Volume 6.** This report contains monthly civilian work force data for 1958 to 1965 for the State, industrial areas and selected counties. Included also are annual averages for nonfarm industries not published monthly for 1958 to 1965 and monthly nonfarm employment and hours and earnings data for 1961 to 1965 for the State and industrial areas. September 1970.

19. **Employment Statistics, Volume 7.** This report contains insured employment by industry in the 10 largest counties in the State for the years 1960 to 1969. October 1970.

20. **Employment Statistics, Volume 8.** This report provides comprehensive data on the age, industry and annual earnings by sex and color of wage and salary workers in employment covered by Old-Age, Survivors, Disability and Health Insurance (OASDHI) in New York State for the years 1959 to 1965. January 1971.

21. **Employment Statistics, Volume 9.** This report contains monthly labor turnover rates in manufacturing industries in New York State and Industrial Areas, 1966-1970. November 1972.

22. **Employment Statistics, Volume 10.** This report is a continuation of *Employment Statistics, Volume 6*. It contains monthly civilian work force data for 1966-1970 for the State, major areas and selected counties. Included also are monthly nonfarm employment and earnings and hours data and annual averages for nonfarm industries and not published monthly for 1966-1970 for the State and major areas. August 1973.

23. **Employment Statistics, Volume 11.** This report contains data on annual employment, payrolls and earnings by industry of employees covered by unemployment insurance for the State, industrial areas and counties from 1968-1973. March 1975.

24. **Employment Statistics, Volume 12.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1974-1977. Data for the New York City Area cover 1972-1977. December 1978.

SPECIAL REPORTS

30. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

31. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

32. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

33. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the State. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in Federal and State legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the State (in 1976) who worked in industries covered by this report.

B-PUBLICATIONS--Continued

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the State, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public Information, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1979.** This edition lists names and addresses of principal or executive officers of over 5,000 local, State and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $5.00.

LABOR RESEARCH REPORTS

77-30. **Characteristics of Exhaustees of Emergency Unemployment Insurance Benefits, New York State, 1975.** Characteristics of some 124,000 unemployment insurance beneficiaries who exhausted emergency benefits in 1975.

77-62. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1967-68 through 1972-73.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the 6 benefit years from 1967-68 through 1972-73. The report is a successor to the reports on claimant characteristics previously issued annually.

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area
78-4 Westchester-Rockland Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

EMPLOYMENT REVIEW

SEPTEMBER 1982
VOL. 35 NO. 9

STATE OF NEW YORK
Hugh L. Carey, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner of Labor

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS – Louis Schisa, Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
September 1982

Civilian Labor Force

The number of New York State residents with jobs in September 1982 was 7,234,000, which was 242,000 lower than a month ago and 118,000 less than a year ago.

Joblessness in the State fell 18,000 to 667,000 between August and September. However, the September unemployment level was 116,000 higher than a year ago.

The sharp decline in employment offset the reduction in unemployment, which resulted in the State's unemployment rate remaining at 8.4 percent between August and September 1982. Over the past 12 months, the jobless rate has risen 1.4 percentage points.

The impact of the national recession, which has been gaining momentum in New York State in recent months, was masked in September due to a less-than-normal drop in government employment. The government decline (-20,300) was smaller than in prior years because there were fewer persons enrolled in the CETA Summer Youth Program, and fewer temporary summer workers hired for other government activities this year.

Nonfarm Employment

The nonagricultural wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) fell 13,300 from August 1982 to 7,251,100 in September 1982. This decrease was almost 21,000 less than the average August-September job reduction over the past 4 years, largely because of the change in government payrolls as described above.

In addition to government, services (-9,900) and finance, insurance, and real estate (-4,700) employers reported nonmanufacturing job losses over the month. The decline in services jobs was slightly greater than usual because of cutbacks in health and business services and reduced hiring among private schools. These components normally have a significant tempering effect upon seasonal losses among some of the other services components. The finance, insurance, and real estate division's payroll reduction was shared by all of its components, with two-thirds of the downturn concentrated in the banking and real estate industries. The only other notable job loss occurred in the construction industry (-800). Nearly all of the decline in construction employment was located in the building construction industry which was cutting back workers in response to general inactivity.

Seasonal increases in the trade (+10,600) and transportation and public utilities (+5,700) groups softened the above employment decreases. All of the upturn in trade payrolls was in the retail segment, particularly department stores and restaurants. The return to work of school bus drivers because of the start of the school year dominated the gain in transportation and public utilities jobs.

The manufacturing sector enjoyed primarily seasonal gains of 6,300 jobs over the month. Hiring by durable goods employers accounted for 3,800 or 60 percent of the factory expansion. Recalls of auto workers, following the reopening of a plant previously shut down for model changeover, were mainly responsible for the upturn in transportation equipment payrolls (+4,600).

The stone, clay, glass and concrete (+800), primary metals (+700) and fabricated metals (+700) industries also registered major job additions. The job hike in the stone, clay, glass and concrete industry reflected the reopening of a nonmetallic mineral product plant. Primary metals payrolls grew because of expansion in the blast furnace industry, while nearly all categories of the fabricated metals industry bolstered their staffs to meet increased product demand. Seasonal layoffs in the instruments, photo and optical goods (-2,100), and nonelectrical machinery (-600) industries, coupled with an unexpected drop in the electrical machinery industry (-500), slowed the hard goods upswing. Most of the decline in instruments payrolls occurred in the photographic industry, where temporary summer help were leaving their jobs to return to school. The bulk of the reduction in nonelectrical machinery jobs occurred in the metal working machinery and office machine industries. Electrical machinery employment was down because of lack of business in the communication equipment and electronic component segments.

The nondurable goods job level rose 2,600 in September, primarily because of gains in the apparel industry (+2,900). Seasonal hiring in the women's outerwear industry accounted for the majority of the apparel job upturn. The food (+400) and printing and publishing (+400) industries posted smaller gains. The rise in food payrolls was mainly seasonal, while staff additions to meet increased demand for commercial printing products sparked the increase in printing and publishing jobs. The remaining soft goods industries either remained unchanged over the month or experienced minor losses in their job levels, with the exception of the chemical industry (-500). General inactivity prompted the cutbacks in chemical employment.

Since September 1981, the State nonfarm job level has fallen 44,100. A loss of 68,500 factory jobs accounted for all of the downturn.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative Federal-State program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "Balance of State" (State less New York City). In these areas, a series of factors are applied to administrative statistics from State unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "Balance of State" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past 4 weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1981 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics on average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

[1] Subarea of New York City Area.

[2] Combination of New York City Area and Nassau-Suffolk Area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the Office of Statistical Standards, Bureau of the Budget, Executive Office of the President. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the State. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the State, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and Federal, State, and Local Government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Labor News Memorandum.** Bi-weekly. Newsletter of State and general labor information including bi-weekly strike data, projections of employment and wage data for industries and occupations important in this State.

10. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

11. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

EMPLOYMENT STATISTICS REPORTS

12. **Employment Statistics, Volume 1.** This report contains data on monthly nonfarm employment by industry in New York State from 1939 to 1949. It also contains data on hours and earnings of production workers in manufacturing industries in the State from 1947 to 1949. June 1966.

13. **Employment Statistics, Volume 2.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1959 to 1965. June 1966.

14. **Employment Statistics, Volume 3.** This report contains monthly nonfarm employment data for New York State and New York City from 1950 to 1960 and for the State's industrial areas from 1951 to 1960. It also contains monthly data on hours and earnings of production workers in manufacturing for New York State and New York City from 1950 to 1960. April 1967.

15. **Employment Statistics, Volume 3, Supplement.** Completes the presentations of nonfarm employment, hours and earnings data for the years 1947 to 1960 for the industrial areas of the State. July 1968.

18. **Employment Statistics, Volume 6.** This report contains monthly civilian work force data for 1958 to 1965 for the State, industrial areas and selected counties. Included also are annual averages for nonfarm industries not published monthly for 1958 to 1965 and monthly nonfarm employment and hours and earnings data for 1961 to 1965 for the State and industrial areas. September 1970.

19. **Employment Statistics, Volume 7.** This report contains insured employment by industry in the 10 largest counties in the State for the years 1960 to 1969. October 1970.

20. **Employment Statistics, Volume 8.** This report provides comprehensive data on the age, industry and annual earnings by sex and color of wage and salary workers in employment covered by Old-Age, Survivors, Disability and Health Insurance (OASDHI) in New York State for the years 1959 to 1965. January 1971.

21. **Employment Statistics, Volume 9.** This report contains monthly labor turnover rates in manufacturing industries in New York State and Industrial Areas, 1966-1970. November 1972.

22. **Employment Statistics, Volume 10.** This report is a continuation of *Employment Statistics, Volume 6*. It contains monthly civilian work force data for 1966-1970 for the State, major areas and selected counties. Included also are monthly nonfarm employment and earnings and hours data and annual averages for nonfarm industries and not published monthly for 1966-1970 for the State and major areas. August 1973.

23. **Employment Statistics, Volume 11.** This report contains data on annual employment, payrolls and earnings by industry of employees covered by unemployment insurance for the State, industrial areas and counties from 1968-1973. March 1975.

24. **Employment Statistics, Volume 12.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1974-1977. Data for the New York City Area cover 1972 1977. December 1978.

SPECIAL REPORTS

30. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

31. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

32. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

33. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers*, and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the State. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in Federal and State legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the State (in 1976) who worked in industries covered by this report.

B-PUBLICATIONS--Continued

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the State, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public Information, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1979.** This edition lists names and addresses of principal or executive officers of over 5,000 local, State and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $5.00.

LABOR RESEARCH REPORTS

77-30. **Characteristics of Exhaustees of Emergency Unemployment Insurance Benefits, New York State, 1975.** Characteristics of some 124,000 unemployment insurance beneficiaries who exhausted emergency benefits in 1975.

77-62. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1967-68 through 1972-73.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the 6 benefit years from 1967-68 through 1972-73. The report is a successor to the reports on claimant characteristics previously issued annually.

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area

78-4 Westchester-Rockland Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extends as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

MONTH IN REVIEW
October 1982

Civilian Labor Force

The number of New York State residents with jobs edged downwards 3,000 between September and October 1982 to 7,231,000. The October 1982 figure was 171,000 lower than a year ago.

Total unemployment grew 49,000 over the month to 716,000 in October 1982. Since October 1981, the number of jobseekers has increased 182,000.

The rate of unemployment in October 1982 was 9.0 percent, a gain of 0.6 of a percentage point from a month ago, and a rise of 2.3 percentage points from a year ago.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 32,500 between September and October 1982 to 7,283,300. This gain was approximately 23,000 below the average September-October advance of the past 2 years, mostly because of the largest September-October job loss in 12 years in the durable goods manufacturing segment.

The number of nonmanufacturing jobs increased by 49,900 in October. This gain was slightly below the average September-October increase over the past 2 years, primarily because of subnormal job growth in services and government. Nevertheless, seasonal staff expansion in government payrolls (+34,900) among local school systems highlighted the nonmanufacturing employment expansion. Most of the pickup in services jobs (+15,100) occurred among private schools. Trade (+2,900) and construction (+900) divisions reported lesser advances. The bulk of the gain in trade was distributed among its retail components, while the end of a strike in the building construction industry downstate more than offset seasonal cutbacks elsewhere in the construction industry. Primarily seasonal job losses in the finance, insurance, and real estate (-2,000) and the transportation and public utilities (-1,900) industry divisions tempered these job increases. Most of the decline in finance, insurance, and real estate jobs occurred in the real estate portion. The employment decrease in the transportation and public utilities division was located in the trucking and water transportation industries.

The manufacturing sector, where employment normally registers little change at this time of year, lost 17,400 jobs in October 1982. As indicated above, the durable goods segment, in response to recessionary pressures, fell by 11,900, the largest September-October decline since 1970. Most of the hard goods job reduction centered around the automobile and automobile-related industries, which have been hard-hit by the recent recession. Nearly 30 percent of the downturn occurred in the transportation equipment industry (-3,400), down mainly because of plant shutdowns and cutbacks in the motor vehicle assembly and equipment categories. Other auto-related hard goods components all reported over-the-month job losses, with the largest decreases posted by the primary metals (-1,900), nonelectrical machinery (-1,600), electrical machinery (-1,100), and fabricated metals (-900) industries. The instruments industry (-1,900), which normally registers a moderate increase in October, was down largely because of a temporary partial plant shutdown in the photographic category.

Nondurable goods employment dropped 5,500 over the month. This was greater than comparable declines in recent years. The larger-than-normal decrease could be traced to contraseasonal reductions in apparel (-2,000) and printing and publishing (-900) jobs. Job cutbacks stemming from lack of orders for women's outerwear caused most of the drop in apparel employment, while temporary partial closings by several newspaper firms were the main reason for the downturn in printing and publishing payrolls. The food (-1,300), paper (-500), and chemical (-500) industries registered mainly seasonal decreases. The leather industry (+300), which was up seasonally, was the only soft goods component to experience an over-the-month job increase.

Compared with a year ago, the October 1982 nonfarm job count was lower by 61,500. This was the fifth consecutive month that nonagricultural wage and salary payrolls were below year-ago levels. All of the reduction occurred in the factory sector, which had lost 84,300 jobs since October 1981. In fact, the manufacturing job count was at the lowest level in 43 years.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

(Not seasonally adjusted)

Area	Employed (in 000's)			Unemployed (in 000's)			Rate of unemployment [1]

Table B-2. EMPLOYEES, EARNINGS AND HOURS IN NONAGRICULTURAL ESTABLISHMENTS, BY INDUSTRY NEW YORK CITY--Continued

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for September 1982 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
	Durable goods	$289.45	38.8	$7.46
25	Furniture and fixtures	274.44	38.7	7.10
254	Partitions and fixtures	323.21	40.3	8.02
34	Fabricated metal products	279.08	38.6	7.23
344	Fabricated structural metal products	338.94	39.2	8.57
355	Special industry machinery	343.97	40.9	8.41
367	Electronic components & access.	294.12	38.0	7.74
232	Men's and boys' furnishings and work clothing	207.76	34.8	5.97
234	Women's, childrens'. infants' undergarments	204.24	34.5	5.92

[3] Data for banking (SIC 60) for January-September 1982 are listed below:

Month	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*	*Month*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
January	$298.55	36.1	$8.27	June	$310.10	36.1	$8.59
February	301.68	36.0	8.38	July	309.60	36.0	8.60
March	303.24	36.1	8.40	August	317.16	36.0	8.81
April	304.79	35.9	8.49	September	312.38	35.7	8.75
May	305.51	35.9	8.51				

[4] Represents the number of checks issued regardless of funding source to individuals in: State departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative Federal-State program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "Balance of State" (State less New York City). In these areas, a series of factors are applied to administrative statistics from State unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "Balance of State" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past 4 weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1981 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

[1] Subarea of New York City Area.

[2] Combination of New York City Area and Nassau-Suffolk Area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the Office of Statistical Standards, Bureau of the Budget, Executive Office of the President. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the State. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the State, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and Federal, State, and Local Government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Labor News Memorandum.** Bi-weekly. Newsletter of State and general labor information including bi-weekly strike data, projections of employment and wage data for industries and occupations important in this State.

10. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

11. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

EMPLOYMENT STATISTICS REPORTS

12. **Employment Statistics, Volume 1.** This report contains data on monthly nonfarm employment by industry in New York State from 1939 to 1949. It also contains data on hours and earnings of production workers in manufacturing industries in the State from 1947 to 1949. June 1966.

13. **Employment Statistics, Volume 2.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1959 to 1965. June 1966.

14. **Employment Statistics, Volume 3.** This report contains monthly nonfarm employment data for New York State and New York City from 1950 to 1960 and for the State's industrial areas from 1951 to 1960. It also contains monthly data on hours and earnings of production workers in manufacturing for New York State and New York City from 1950 to 1960. April 1967.

15. **Employment Statistics, Volume 3, Supplement.** Completes the presentations of nonfarm employment, hours and earnings data for the years 1947 to 1960 for the industrial areas of the State. July 1968.

18. **Employment Statistics, Volume 6.** This report contains monthly civilian work force data for 1958 to 1965 for the State, industrial areas and selected counties. Included also are annual averages for nonfarm industries not published monthly for 1958 to 1965 and monthly nonfarm employment and hours and earnings data for 1961 to 1965 for the State and industrial areas. September 1970.

19. **Employment Statistics, Volume 7.** This report contains insured employment by industry in the 10 largest counties in the State for the years 1960 to 1969. October 1970.

20. **Employment Statistics, Volume 8.** This report provides comprehensive data on the age, industry and annual earnings by sex and color of wage and salary workers in employment covered by Old-Age, Survivors, Disability and Health Insurance (OASDHI) in New York State for the years 1959 to 1965. January 1971.

21. **Employment Statistics, Volume 9.** This report contains monthly labor turnover rates in manufacturing industries in New York State and Industrial Areas, 1966-1970. November 1972.

22. **Employment Statistics, Volume 10.** This report is a continuation of *Employment Statistics, Volume 6*. It contains monthly civilian work force data for 1966-1970 for the State, major areas and selected counties. Included also are monthly nonfarm employment and earnings and hours data and annual averages for nonfarm industries and not published monthly for 1966-1970 for the State and major areas. August 1973.

23. **Employment Statistics, Volume 11.** This report contains data on annual employment, payrolls and earnings by industry of employees covered by unemployment insurance for the State, industrial areas and counties from 1968-1973. March 1975.

24. **Employment Statistics, Volume 12.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1974-1977. Data for the New York City Area cover 1972-1977. December 1978.

SPECIAL REPORTS

30. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

31. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

32. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

33. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the State. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in Federal and State legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the State (in 1976) who worked in industries covered by this report.

B-PUBLICATIONS--Continued

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the State, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public Information, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1979.** This edition lists names and addresses of principal or executive officers of over 5,000 local, State and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $5.00.

LABOR RESEARCH REPORTS

77-30\. **Characteristics of Exhaustees of Emergency Unemployment Insurance Benefits, New York State, 1975.** Characteristics of some 124,000 unemployment insurance beneficiaries who exhausted emergency benefits in 1975.

77-62\. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1967-68 through 1972-73.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the 6 benefit years from 1967-68 through 1972-73. The report is a successor to the reports on claimant characteristics previously issued annually.

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area
78-4 Westchester-Rockland Area

79-2\. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3\. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1\. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3\. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

EMPLOYMENT REVIEW

NOVEMBER 1982
VOL. 35 NO. 11

Insured Employment and Payrolls
First Quarter 1982

Insured Employment and Payrolls in Selected Counties
with Employment of 100,000 or More
First Quarter 1982

STATE OF NEW YORK
Hugh L. Carey, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner of Labor

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Louis Schisa, Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for thecountry as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
November 1982

Civilian Labor Force

The number of employed New York State residents fell 76,000 from October 1982 to 7,155,000 in November 1982. Since November 1981, resident employment has declined 170,000.

Total unemployment in the State rose 37,000 between October and November 1982 to 753,000. Compared with a year ago, the current jobless level was higher by 176,000.

The State's rate of unemployment in November 1982 was 9.5 percent, an increase of 0.5 of a percentage point from a month ago and 2.2 percentage points from a year ago.

New York State's economy in November 1982 continued to deteriorate as the over-the-month increase in nonfarm employment was well below its usual gain.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) edged upwards 2,800 from October 1982 to 7,286,100 in November 1982. This increase was far below the 20,000 average gain experienced over the past three years. The over-the-month shortfall reflected weakness in the factory sector and a below-normal advance in nonmanufacturing employment.

Nonmanufacturing payrolls grew by 17,900 between October and November 1982--or nearly 11,000 less than normal for this time of year. Below-average increases in several industry divisions, coupled with contraseasonal cutbacks in others, accounted for the less-than-normal expansion. All of the seasonal hiring was concentrated in trade (+16,400) and government (+9,800) as retail department and specialty stores bolstered their staffs in anticipation of the holiday shopping season and local education systems supplemented their pay rosters. However, the overall advance in trade was sluggish when compared to prior Novembers. Seasonal hiring in local education was somewhat dampened by budgetary cutbacks among state noneducation agencies. The remaining nonmanufacturing industry divisions all posted job losses, with the largest decreases reported by the construction (-3,000) and services (-2,800) groups. The completion of projects, normal for this time of year, prompted the downturn in construction jobs. Most of the decline in services jobs occurred among amusement and recreational services, and seasonal hotels and motels. A labor-management dispute in the legal services industry plus a general slowdown in business among other services components also contributed to the lower job count. The finance, insurance, and real estate division (-500) was down contraseasonally because of a business slowdown in the banking and insurance industries. Increases in these industries usually more than offset seasonal losses in the real estate segment.

The count of jobs among the State's manufacturers continued to spiral downwards as factory payrolls in November fell to their lowest point since July 1939. Manufacturing employment dropped 15,000 over the month, about 7,000 more than comparable seasonal job reductions in recent years. Durable goods was the harder hit of the two factory categories, losing 7,800 jobs, with most of the furloughs connected with the slumping automobile industry. Cutbacks in the transportation equipment industry (-3,600) dominated the hard goods downturn, primarily because of layoffs in the automotive equipment and assembly components. Other auto-related job decreases occurred in the nonelectrical machinery (-1,400), electrical machinery (-1,300), and primary metals (-700) industries. Jobs in the instruments, photo, and optical goods industry (-500) fell unexpectedly because of an industrywide slowdown in product demand. The only hard goods industry to report increased payroll count was furniture (+200) as strikers returned to work and hiring occurred in the household furniture portion.

Nondurable goods employment fell 7,300 in November, mainly the result of seasonal influences. Over 45 percent of the soft goods job reduction occurred in the apparel industry (-3,400), with the women's outerwear category accounting for the bulk of the decrease. The toy-making portion of the miscellaneous manufacturing industry (-1,400), the canning segment of the food industry (-1,000), and the plastics segment of the rubber and plastics industry (-700) posted notable job losses.

The November 1982 nonfarm job level was 68,800 below the total recorded 12 months ago, the sixth consecutive month that an over-the-year loss had occurred. Cutbacks in the manufacturing sector accounted for 86,100 or all of the nonfarm reduction.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

(Not seasonally adjusted)

Area	Employed (in 000's)			Unemployed (in 000's)			Rate of unemployment [1]		
	Nov. 1982	Oct. 1982 (r)	Nov. 1981 (r)	Nov. 1982	Oct. 1982 (r)	Nov. 1981 (r)	Nov. 1982	Oct. 1982 (r)	Nov. 1981 (r)

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for October 1982 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
231	Men's & boys' suits, coats & overcoats	$251.67	35.1	$7.17
701	Hotels (year-round)	231.29	32.9	7.03

[3] Represents the number of checks issued regardless of funding source to individuals in: State departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for October 1982 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
30	Rubber and misc. plastics products	$239.12	39.2	$6.10
314	Footwear, except rubber	172.04	34.0	5.06
701	Hotels (year-round)	290.50	35.0	8.30

[3] Represents the number of checks issued regardless of funding source to individuals in: State departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

INSURED EMPLOYMENT AND PAYROLLS
FIRST QUARTER 1982

INSURED EMPLOYMENT AND PAYROLLS
FIRST QUARTER 1982

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them case remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the Federal Amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the Federal Government, New York State and local government units covered for unemployment compensation purposes, are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the Law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or grographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from on location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual,* and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than on esttablishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates in a single county two or more establishments that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during thee same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the Office of Statistical Standards, Bureau of the Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than 4 reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the State, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New york State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy*. Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
--**Buffalo*. Erie and Niagara counties.
--**Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Statdard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

SOURCE OF DATA. Reports submitted quarterly by employers subject to the new York State Unemployment Insurance Law.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FIRST QUARTER 1982

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative Federal-State program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "Balance of State" (State less New York City). In these areas, a series of factors are applied to administrative statistics from State unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "Balance of State" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past 4 weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1981 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

[1] Subarea of New York City Area.
[2] Combination of New York City Area and Nassau-Suffolk Area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the Office of Statistical Standards, Bureau of the Budget, Executive Office of the President. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the State. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the State, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and Federal, State, and Local Government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Labor News Memorandum.** Bi-weekly. Newsletter of State and general labor information including bi-weekly strike data, projections of employment and wage data for industries and occupations important in this State.

10. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

11. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

EMPLOYMENT STATISTICS REPORTS

12. **Employment Statistics, Volume 1.** This report contains data on monthly nonfarm employment by industry in New York State from 1939 to 1949. It also contains data on hours and earnings of production workers in manufacturing industries in the State from 1947 to 1949. June 1966.

13. **Employment Statistics, Volume 2.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1959 to 1965. June 1966.

14. **Employment Statistics, Volume 3.** This report contains monthly nonfarm employment data for New York State and New York City from 1950 to 1960 and for the State's industrial areas from 1951 to 1960. It also contains monthly data on hours and earnings of production workers in manufacturing for New York State and New York City from 1950 to 1960. April 1967.

15. **Employment Statistics, Volume 3, Supplement.** Completes the presentations of nonfarm employment, hours and earnings data for the years 1947 to 1960 for the industrial areas of the State. July 1968.

18. **Employment Statistics, Volume 6.** This report contains monthly civilian work force data for 1958 to 1965 for the State, industrial areas and selected counties. Included also are annual averages for nonfarm industries not published monthly for 1958 to 1965 and monthly nonfarm employment and hours and earnings data for 1961 to 1965 for the State and industrial areas. September 1970.

19. **Employment Statistics, Volume 7.** This report contains insured employment by industry in the 10 largest counties in the State for the years 1960 to 1969. October 1970.

20. **Employment Statistics, Volume 8.** This report provides comprehensive data on the age, industry and annual earnings by sex and color of wage and salary workers in employment covered by Old-Age, Survivors, Disability and Health Insurance (OASDHI) in New York State for the years 1959 to 1965. January 1971.

21. **Employment Statistics, Volume 9.** This report contains monthly labor turnover rates in manufacturing industries in New York State and Industrial Areas, 1966-1970. November 1972.

22. **Employment Statistics, Volume 10.** This report is a continuation of *Employment Statistics, Volume 6.* It contains monthly civilian work force data for 1966-1970 for the State, major areas and selected counties. Included also are monthly nonfarm employment and earnings and hours data and annual averages for nonfarm industries and not published monthly for 1966-1970 for the State and major areas. August 1973.

23. **Employment Statistics, Volume 11.** This report contains data on annual employment, payrolls and earnings by industry of employees covered by unemployment insurance for the State, industrial areas and counties from 1968-1973. March 1975.

24. **Employment Statistics, Volume 12.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1974 1977. Data for the New York City Area cover 1972-1977. December 1978.

SPECIAL REPORTS

30. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

31. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

32. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

33. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the State. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in Federal and State legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the State (in 1976) who worked in industries covered by this report.

B-PUBLICATIONS--Continued

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the State, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public Information, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, State and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area
78-4 Westchester-Rockland Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
December 1982

Civilian Labor Force

The number of New York State residents with jobs in December 1982 was 7,192,000, an increase of 37,000 from a month ago, but a decrease of 129,000 from a year ago.

Total unemployment in the State fell 80,000 from November 1982 to 673,000 in December 1982. Since December 1981, the number of persons seeking work has risen 61,000.

The decline in joblessness, coupled with the rise in employment, caused the rate of unemployment to drop 0.9 of a percentage point to 8.6 percent between November and December 1982. The jobless rate 12 months ago was 7.7 percent.

The job situation in New York State in December 1982 continued to worsen as nonfarm employment experienced its first November-December loss since 1974, when the State's economy was also mired in a recession.

Nonfarm Employment

The nonagricultural wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) declined 1,300 from November 1982 to 7,284,800 in December 1982 in contrast to a 7,400 average November-December gain over the past four years. The downturn could be traced to seasonal losses in manufacturing which are normally outweighed by gains in nonmanufacturing. However, this year the November-December upturn in nonmanufacturing jobs failed to offset factory losses.

Manufacturing employment fell 17,200 between November and December, slightly more than the average loss and December over the past four years, as factory jobs reached their lowest level since July 1939. Anticipated cutbacks among nondurable goods components accounted for 15,100 or most of the factory job decreases. Approximately 45 percent of the soft goods downturn occurred in the apparel industry (-6,800), with the bulk of the decrease in the women's outerwear category. The miscellaneous manufacturing (-2,600), food (-1,800), textile (-1,400), and leather (-1,400) industries also reported notable job decreases. The majority of the drop in miscellaneous manufacturing employment was centered in the toy-making industry, while nearly all of the loss in food payrolls occurred in the canning industry. Job cutbacks among knitting mills accounted for all of the reduction in textile payrolls. At the same time, all categories of the leather industry shared in the seasonal decline, with a temporary partial shutdown of a women's handbag factory further depressing the industry's job level. Smaller job decreases were posted by the remaining soft goods components.

The durable goods job level declined 2,000 in December. The largest hard goods employment loss occurred in the instruments, photo, and optical goods industry (-1,700), the fifth consecutive month-to-month decline for this historically robust industry. Cutbacks in the production of photographic equipment and supplies caused most of the decrease in payrolls. Continuing retrenchment in the steel industry resulted in large job reductions in the primary metals (-900) and fabricated metals (-800) components. Hiring in the transportation equipment (+1,900) and nonelectrical machinery (+200) industries slowed the hard goods job decline. Staff buildup in the motor vehicle industry to meet production demands for new model automobiles accounted for the rise in transportation equipment payrolls.

The job count in nonmanufacturing increased 15,800 from November to December, or about 7,600 below the usual pace for this time of year. Less-than-seasonal advances among the industry divisions were responsible for the lackluster performance in the nonmanufacturing job expansion. The second smallest November-December job gain in trade (+23,500) on record reflected the reduced disposable income that accompanies a depressed economy. Below-average job growth also occurred in the finance, insurance, and real estate (+1,200), services (+700), and government (+400) industry divisions. Minimal gains in the banking and brokerage industries, plus an unexpected drop in the insurance portion, accounted for the poor showing in the finance, insurance, and real estate group. An earlier-than-expected recess among some private colleges and universities greatly tempered seasonal job gains among other service components. The advance in public employment was caused by seasonal hiring in the postal division and in state and local education components. However, budgetary cutbacks among local and state noneducation agencies softened the government job gain. Seasonal job losses in the construction (-9,500), mining (-300), and transportation and public utilities (-300) industry divisions tempered the nonmanufacturing upturn.

Since December 1981, the State has lost 70,900 nonfarm jobs. Manufacturing payroll losses accounted for 86,200 or all of the nonfarm downturn. Among the other industry divisions, only the services (+20,400) and finance, insurance, and real estate (+10,400) groups had higher job levels than a year ago.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

[1] Unemployed as percent of combined total of employed and unemployed.

UNEMPLOYMENT INSURANCE TAX RATES, 1982

Elias D. Loizides

HIGHLIGHTS

- Unemployment insurance tax rates for 1982 average 3.13 percent of taxable payrolls--a combination of 2.13 percent normal tax, and 1.0 percent subsidiary tax.

- In 1981, the combined rate was 3.24 percent, including an average normal tax of 2.24 percent, and a 1.0 percent subsidiary tax.

- Among the major industry groups, average tax rates were highest in the construction; agriculture, forestry, and fishing; and apparel industries; and they were lowest in finance, insurance, and real estate; and in the transportation and public utilities division. There was wide variation within divisions, however.

- Firms with taxable payrolls under $10,000 or over $25 million had the lowest U.I. tax rates, on the average, while rates averaged highest among employers in the $100,000 to $1,000,000 range of taxable payrolls.

PROVISIONS FOR RATE ASSIGNMENT

Under the current New York State system, covered employers pay unemployment insurance taxes on the first $6,000 of wages that they pay to each of their employees during the calendar year.[1] These taxes are pooled in an Unemployment Insurance Fund, from which benefits are paid to all eligible unemployed workers.

In most years an employer's tax rate is composed of two parts: (1) a normal rate, which may be based upon his experience with unemployment and (2) a subsidiary rate, which is the same for all employers.

To vary employers' normal tax rates according to the incidence of unemployment among their workers (often referred to as "experience rating"), a bookkeeping account is set up within the Unemployment Insurance Fund for each covered employer. His normal taxes are credited, and chargeable benefits paid to his former employees are debited to his individual account. On December 31, the rate-computation date, his account balance is computed as a percentage of his annual taxable wages, and this "account percentage" is the measure of experience on which his normal tax rate for the next year is based. An account percentage may be positive or negative depending upon whether the account showed a positive or negative balance at the end of the year.

Once an employer's account percentage has been computed, his normal tax rate is read from the tax table for experience rating shown in Table 1. The seven columns in the tax table show seven alternative rate schedules, only one of which is applicable in any year. The appropriate schedule depends on the level of reserves in the Unemployment Insurance Fund--the higher the reserves, the lower the scale of rates. The measure of reserve level used for selecting the proper rate column is the Size-of-Fund Index, which is computed by expressing total year-end reserves as a percentage of the combined taxable wages of all liable firms. On December 31, 1981, the Index stood at 2.16 percent [2]; therefore the first column of normal rates in the table applied for 1982, as it has since January 1, 1976. Rates in this column range from 0.5 percent to 4.2 percent.

Following the assignment of normal tax rates for the coming year (but as of the same computation date), the amount of any individual negative account balance that exceeds 2 percent of the employer's annual taxable wages is transferred as a charge to a General Account in the Unemployment Insurance Fund. Thus, no firm starts the next year with a deficit of more than 2 percent. However, if an employer has part of a negative balance transferred, the rates assigned to him on the next three December 31 rate-computation dates are restricted to not less than 2.7 percent.

To compensate for the negative-balance transfers, the General Account is credited with the interest earned on reserves in the Fund, but the interest alone is not enough to fully offset the transfers. The law therefore provides that if the year-end balance in the General Account is less than $120 million, all employers liable for unemployment insurance taxes pay a subsidiary tax in the coming year in addition to their normal tax, and the proceeds from the subsidiary tax are credited to the General Account. (There are also other minor credits and charges.) The subsidiary rate varies from 0.1 percent to 1.0 percent, according to the size of the General Account balance, but it cannot increase more than 0.3 percent in any one year. On December 31, 1981, there was a deficit of $1,114 million in the General Account, requiring the subsidiary rate to remain at the maximum 1.0 percent for 1982.

---

[1] Covered local governments and nonprofit organizations may elect to reimburse the Unemployment Insurance Fund for benefits paid former employees, instead of paying taxes; the State of New York also reimburses the Fund for benefits.

[2] There was a net positive balance of $744 million in the Fund at the end of 1981.

Although most firms' normal tax rates are based on their individual experience, a few categories of employers are not qualified for experience rating and are assigned special rates fixed by law. Thus, an employer who has not filed all prescribed reports by the computation date must pay a normal rate of 2.7 percent, unless a higher rate would otherwise apply to him. A firm that has not been in the system more than a year (provided it is not delinquent in filing reports) is assigned either the highest normal rate applicable to a qualified employer with a positive-account balance, or 2.7 percent, whichever is lower. The same provision applies to firms that paid no wages in the last payroll year. For 1982, the normal rate for these two groups of employers was 2.7 percent.

Finally, employers in the apparel industry may elect a fixed rate of 3.0 percent in place of the rates that would otherwise apply to them under experience rating and employers in the construction industry and those engaged in processing local fresh fruits and vegetables may elect a fixed rate of 3.2 percent. These elections, which may be renewed, are for three years.

RATE ASSIGNMENTS FOR 1982

Normal Tax Rates

On the December 31, 1981 computation date, almost 392,000 employers were assigned tax rates for 1982 (see Table 2). For less than 63,000 of these firms, the normal tax rate was fixed by statute at 2.7 percent, bringing their combined normal plus subsidiary tax to 3.7 percent. Each of these specially rated firms was in one of three categories of nonqualified employers described previously, or had had a portion of a negative balance transferred to the General Account within the last three years. Almost 30,000 of the nonqualified firms had been in the U.I. system less than a year. The firms whose normal rates were fixed by statute (excluding those that paid no wages in the past year) comprised about 14 percent of all liable firms but had less than 3 percent of the taxable payrolls. Although the payrolls of newly liable employers covered less than a full year, it is nevertheless apparent that the firms with rates fixed by law were smaller than average.[3]

There were almost 13,000 employers in the apparel, construction, and food processing industries that had elected fixed normal rates of 3.0 percent and 3.2 percent. These employers had combined rates of 4.0 percent and 4.2 percent.

The remaining 316,536 employers were assigned rates for 1982 from the tax table for experience rating. Almost 51,000 of these firms--about 13 percent of all liable firms with less than 14 percent of the taxable payrolls--had negative account balances. Their combined tax rates ranged from 4.3 percent to 5.2 percent, and more than 21,000 firms were assigned the maximum rate. The total number of negative balance firms was almost 5,000 less than a year earlier, and the number at the maximum rate decreased by more than 3,000. These decreases reflect a resumed downtrend during 1981 of New York State's insured unemployment rate.

Some 266,000 positive balance firms accounted for 68 percent of the employers and 79 percent of the taxable payrolls. Combined tax rates for these employers ranged from 1.5 percent to 4.1 percent. Almost 79,000 firms qualified for the minimum rate, about 11,000 more firms than qualified for the minimum rate in 1981. This rise in number of firms paying the minimum rate (20.1 percent of all employers, compared with 17.4 percent in 1981) is due to a gradual resettling of positive balance employers back to their pre-1978 levels of account percentage.[4]

---

[3] The size of a firm is defined by its annual taxable payrolls reported for the 12-month period ending September 30.

[4] As noted earlier, an employer's account percentage is the December 31 balance in his account in the Unemployment Insurance Fund, expressed as a percentage of his taxable wages in the most recent payroll year. The change in tax base from $4,200 in 1977 to $6,000 in 1978 increased the denominators of account percentages, and thus lowered positive-balance employers' account percentages from what they would have been on the $4,200 base. This caused normal tax rates to rise for many of these firms. In 1979, however, a readjustment set in, as the additional revenue resulting from the higher rates and higher tax base began to raise account balances and to reduce normal tax rates. This adjustment process continued in 1981. Employers in the upper positive account percentage brackets were most affected by the dislocation and readjustment. For example, 19.6 percent of all liable employers were assigned the minimum rate on December 31, 1977; 14.0 percent on December 31, 1978; 17.4 percent on December 31, 1980; and 20.1 percent on December 31, 1981.

Subsidiary Tax Rates

The subsidiary tax rate in 1982, uniform for all employers, was at the maximum level of 1.0 percent of taxable payrolls for the ninth consecutive year. For the first time in eight years the deficit decreased, but only slightly from $1,163 million in 1980 to $1,114 million in 1981.

Tax Rates by Industry and Size

Among the major industry divisions, average 1982 tax rates, including normal and subsidiary tax, ranged from 2.52 percent in the finance-insurance-real estate group to 4.03 percent in construction. Within the major divisions, however, average rates for industry subgroups varied widely, as indicated in Table 3.

Average tax rates by size of firm are shown for 1982 in Table 4. Employers were classified by size on the basis of their taxable payrolls in the 1981 payroll year. Tax rates averaged lowest for firms with taxable payrolls less than $10,000 or over $25 million and highest for those with taxable payrolls ranging from $100,000 to $1,000,000.

Tax Rates on Total and Taxable Payrolls

The average combined tax rate on taxable payrolls for 1982 was 3.13 percent. In 1981, the average rate was 3.24 percent. The average effective tax rate as a percent of total payrolls dropped from 1.2 percent in 1981 to 1.1 percent in 1982.

EXPERIENCE IN 1981: PAYROLLS, CONTRIBUTIONS, AND BENEFITS

This section pertains to the 1981 experience of those firms which were active at the end of 1981 and were assigned rates for 1982.

Taxable Payrolls in Relation to Total Payrolls by Industry and Size of Firm

Taxable and total payrolls for the payroll year ending September 30, 1981 are shown by major industry groups in Table 5 and by size of annual taxable payroll in Table 8. In both tables, the data are broken out by positive and negative balance firms. Percentages of payrolls that were taxable (on the $6,000 tax base) varied widely among industry groups and also among size groups.

One cause of this variation is the difference in wage levels among employer groups. Firms with relatively high wage levels tend to have lower percentages of payrolls that are taxable, on the uniform $6,000 wage base, than firms with lower wage levels.

A second factor, labor turnover, affects the percentage of payrolls that are taxable. If a position in a firm is filled by the same individual all year, his wages up to $6,000 are taxable; if it is filled by one person part of the year and by another the rest of the year, wages up to $6,000 are taxable for each of the two employees. Thus, the taxable proportion is likely to be greater in firms and industries where there is high turnover.

Table 5 indicates that among the industry divisions, the transportation-public utilities group, metals and machinery manufacturing, and mining had relatively low percentages of payrolls that were taxable in 1981, while public administration, apparel manufacturing and agriculture, forestry, and fishing had the highest percentages. There was wide variation of taxable percentages among smaller industry groups within major divisions. In most of the industry groups, the taxable proportion averaged higher for negative balance firms than for positive balance firms, as has been the case in previous years.

Table 8 illustrates a downward progression in the average percentage of wages taxable, as the size of firm increases. In the 1981 payroll year, these averages ranged from 51 percent for firms with taxable payrolls below $10,000 to 27 percent for those in the $25 million-and-over bracket.

Contributions and Contribution Rates by Industry and Size of Firm in New York State Calendar Year 1981

Tables 6 and 9 show normal contributions, by industry and by size of firm, credited in 1981 to employer accounts active at the end of the year. (Subsidiary taxes are excluded from these amounts because they are credited to the General Account, not to employer accounts.) The overall normal contribution rate, expressed as a percent of total payrolls, was 0.8 percent.[5]

- The average rate was 0.7 percent of total payrolls for positive balance employers and 1.4 percent for negative balance employers.

- Among industry divisions, average rates were highest for agriculture, forestry, and fishing (1.7 percent), apparel (1.4 percent), public administration (1.4 percent), and construction (1.2 percent). They were lowest for transportation and public utilities, and the finance group, (0.5 percent), and for metals and machinery, and mining groups (0.6 percent).

---

[5] Total payrolls paid to employees of firms with active accounts at the end of 1981, during the 12-month period ending September 30, 1981.

- For all industries combined, the largest and smallest firms had lower contribution rates, on the average, than firms of medium size.

Benefits and Cost Rates by Industry and Size of Firm in New York State, Calendar Year 1981

Tables 7 and 10 show benefit payments, by industry and size of firm, charged in 1981 to employers with active accounts at the end of the year. These charges amounted to an average cost rate of 0.9 percent of total payrolls.

- Negative balance firms were charged with 64 percent of the $852 million of benefits, but these firms comprised only 17 percent of the total number of active employers at the end of the year and had only 18 percent of the 1981 taxable payrolls.

- Positive balance firms had, on the average, a cost rate of 0.4 percent of total payrolls, compared with 3.9 percent for negative balance firms.

- Among industry groups, the highest average cost rate was in agriculture, forestry, and fishing (3.7 percent), followed by apparel (3.4 percent) and construction (3.2 percent), while the finance, insurance, and real estate industry had the lowest cost rate (0.3 percent), followed by transportation and public utilities (0.5 percent). Within industry divisions, cost rates varied widely among subgroups.

- For all industries combined, larger firms tended to have lower cost rates, on the average, than smaller firms.

---

[1] On January 1, 1978, the taxable wage base was raised from $4,200 to $6,000.

[2] An employer's account percentage is the December 31 balance in his account in the Unemployment Insurance Fund, as a percentage of his taxable wages in the last payroll year (ending September 30).

[3] The Size-of-Fund Index is the moneys in the Fund on December 31, as a percentage of all taxable wages in the last payroll year, or as a percentage of the annual average of the taxable wages of the last 3 payroll years, whichever percentage is less.

[4] The U.I. Law specifies that an employer must pay at least 0.3 percent combined normal and subsidiary tax. If in any year, 0.3 percent exceeds the sum of the subsidiary tax rate and his rate from this table, the additional amount paid is credited to his account.

[1] Average rate per dollar of taxable payrolls on $6,000 base; includes subsidiary tax of 1.0 percent.

[2] Accounts of firms that are liable for unemployment insurance tax contributions.

[3] Taxable payrolls for the 12-month period ending September 30, 1981.

[4] Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.

[5] Excludes firms whose rates under experience rating (including 1.0 percent subsidiary tax) are 3.8 or more.

[6] Firms that had parts of negative balances transferred to the General Account within the last 3 payroll years.

[7] Rates assigned to those firms in the apparel, canning and freezing, and construction industries that have elected special rates for a 3-year period as provided by Article 18 of the New York State Unemployment Insurance Labor Law.

[8] Includes firms that failed to file reports by December 31, 1981, or that had negative balance transfers in the last 3 payroll years.

NOTE: Details may not add to totals because of rounding or minor corrections.

Table 3. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY DETAILED INDUSTRY CLASSIFICATION, NEW YORK STATE, 1982

Industry division and group [1]	Number of employer accounts 1982 [2]	Average tax rates [3]
All industries [4]	391,994	3.13
Manufacturing	30,535	3.23

Private households	15,186	2.60
Miscellaneous services	7,434	3.02
Public administration	521	3.53

---

[1] The tax rate data are classified in accordance with the 1972 edition of the Standard Industrial Classification Manual.
[2] Accounts of firms that are liable for unemployment insurance tax contributions.
[3] Average rates per dollar of taxable payrolls on $6,000 base; includes subsidiary tax of 1.0 percent.
[4] Includes 14,616 firms not classified industrially.

Table 4. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY SIZE OF FIRM NEW YORK STATE, 1982

Size of annual taxable payroll [1]	Number of employer accounts 1982 [2]	Average tax rates [3]
All accounts	391,994	3.13
Under $10,000	152,159	2.82
$10,000 to 24,999	99,896	2.97
25,000 to 49,999	58,117	3.18
50,000 to 99,999	37,887	3.37
100,000 to 249,999	26,522	3.53
250,000 to 499,999	9,220	3.57
500,000 to 999,999	4,404	3.51
1,000,000 to 2,499,999	2,475	3.35
2,500,000 to 4,999,999	735	3.13
5,000,000 to 9,999,999	325	3.09
10,000,000 to 24,999,999	167	2.89
25,000,000 and over	87	2.33

[1] Taxable payrolls are for the 12-month period ending September 30, 1981.

[2] Accounts of firms that are liable for unemployment insurance tax contributions as of December 31, 1981.

[3] Average rates per dollar of taxable payrolls on $6,000 base; includes subsidiary tax of 1.0 percent.

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for November 1982 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
254	Partitions and fixtures	$306.50	38.7	$7.92
279	Service industries, for the printing trade	513.92	35.2	14.60

[3] Represents the number of checks issued regardless of funding source to individuals in: State departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

INSURED EMPLOYMENT AND PAYROLLS
SECOND QUARTER 1982

INSURED EMPLOYMENT AND PAYROLLS
SECOND QUARTER 1982

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them case remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the Federal Amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the Federal Government, New York State and local government units covered for unemployment compensation purposes, are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the Law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or grographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from on location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than on esttablishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates in a single county two or more establishments that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during thee same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the Office of Statistical Standards, Bureau of the Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than 4 reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the State, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton.* Broome and Tioga counties.
--**Buffalo.* Erie and Niagara counties.
--**Nassau-Suffolk.* Nassau and Suffolk counties.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome.* Herkimer and Oneida counties.
-- *Westchester.* Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Statdard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

SOURCE OF DATA. Reports submitted quarterly by employers subject to the new York State Unemployment Insurance Law.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
SECOND QUARTER 1982

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative Federal-State program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "Balance of State" (State less New York City). In these areas, a series of factors are applied to administrative statistics from State unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "Balance of State" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past 4 weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1981 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

[1] Subarea of New York City Area.
[2] Combination of New York City Area and Nassau-Suffolk Area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the Office of Statistical Standards, Bureau of the Budget, Executive Office of the President. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the State. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the State, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and Federal, State, and Local Government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Labor News Memorandum.** Bi-weekly. Newsletter of State and general labor information including bi-weekly strike data, projections of employment and wage data for industries and occupations important in this State.

10. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

11. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

EMPLOYMENT STATISTICS REPORTS

12. **Employment Statistics, Volume 1.** This report contains data on monthly nonfarm employment by industry in New York State from 1939 to 1949. It also contains data on hours and earnings of production workers in manufacturing industries in the State from 1947 to 1949. June 1966.

13. **Employment Statistics, Volume 2.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1959 to 1965. June 1966.

14. **Employment Statistics, Volume 3.** This report contains monthly nonfarm employment data for New York State and New York City from 1950 to 1960 and for the State's industrial areas from 1951 to 1960. It also contains monthly data on hours and earnings of production workers in manufacturing for New York State and New York City from 1950 to 1960. April 1967.

15. **Employment Statistics, Volume 3, Supplement.** Completes the presentations of nonfarm employment, hours and earnings data for the years 1947 to 1960 for the industrial areas of the State. July 1968.

18. **Employment Statistics, Volume 6.** This report contains monthly civilian work force data for 1958 to 1965 for the State, industrial areas and selected counties. Included also are annual averages for nonfarm industries not published monthly for 1958 to 1965 and monthly nonfarm employment and hours and earnings data for 1961 to 1965 for the State and industrial areas. September 1970.

19. **Employment Statistics, Volume 7.** This report contains insured employment by industry in the 10 largest counties in the State for the years 1960 to 1969. October 1970.

20. **Employment Statistics, Volume 8.** This report provides comprehensive data on the age, industry and annual earnings by sex and color of wage and salary workers in employment covered by Old-Age, Survivors, Disability and Health Insurance (OASDHI) in New York State for the years 1959 to 1965. January 1971.

21. **Employment Statistics, Volume 9.** This report contains monthly labor turnover rates in manufacturing industries in New York State and Industrial Areas, 1966-1970. November 1972.

22. **Employment Statistics, Volume 10.** This report is a continuation of *Employment Statistics, Volume 6*. It contains monthly civilian work force data for 1966-1970 for the State, major areas and selected counties. Included also are monthly nonfarm employment and earnings and hours data and annual averages for nonfarm industries and not published monthly for 1966-1970 for the State and major areas. August 1973.

23. **Employment Statistics, Volume 11.** This report contains data on annual employment, payrolls and earnings by industry of employees covered by unemployment insurance for the State, industrial areas and counties from 1968-1973. March 1975.

24. **Employment Statistics, Volume 12.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1974-1977. Data for the New York City Area cover 1972-1977. December 1978.

SPECIAL REPORTS

30. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

31. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

32. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

33. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the State. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in Federal and State legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the State (in 1976) who worked in industries covered by this report.

B-PUBLICATIONS--Continued

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the State, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public Information, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, State and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3	Albany-Schenectady-Troy Area
78-6	Binghamton Area
78-5	Buffalo Area
78-1	Nassau-Suffolk Area
78-2	New York City
78-7	Rochester Area
78-8	Syracuse Area
78-9	Utica-Rome Area
78-4	Westchester-Rockland Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

Earnings and Hours in Nonagricultural Establishments
New York State, New York Combined Area, New York City and Upstate Areas, by Industry, 1982

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Louis Schisa, Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
January 1983

Civilian labor force estimates have been adjusted to the 1982 Current Population Survey benchmark. Nonagricultural wage and salary estimates have been adjusted to the 1982 Current Employment Statistics benchmark. These estimates supersede those previously published for 1981 and 1982.

Civilian Labor Force

The level of employment among New York State residents fell 51,000 from December 1982 to 7,148,000 in January 1983. Compared with a year ago, the current employment level was lower by 152,000.

Joblessness in the state was up seasonally in January 1983, rising 81,000 over the month to 755,000. Over the last 12 months, the number of persons seeking work has increased 74,000.

The state's jobless rate jumped a full percentage point between December 1982 and January 1983 to 9.6 percent. In January 1982, the unemployment rate was lower by 1.1 percentage points.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) dropped 172,100 from December 1982 to 7,089,600 in January 1983, primarily the result of seasonal cutbacks in the nonmanufacturing sector. However, the nonfarm downturn was almost 26,000 less than the average December-January decrease over the past five years, reflecting minimal seasonal layoffs from a depleted factory work force and fewer cutbacks by retailers following a smaller than usual temporary staff buildup during the holiday shopping season.

The number of jobs in the nonmanufacturing sector fell 154,300 in January 1983, or nearly 14,000 less than the normal over-the-month decline for this time of year. Approximately 47 percent of the job decrease occurred in trade (-72,500) where all categories, especially retail department stores, were paring temporary staff following the holiday shopping season. The reduction in trade payrolls was smaller than in previous years because fewer temporary personnel were hired during the 1982 holiday shopping season. All of the remaining nonmanufacturing divisions reported seasonal layoffs, with large losses occurring in the services (-29,600), construction (-23,600), and government (-18,100) groups. All categories of the construction trades were down over the month, particularly the special trade contractor's segment, as the industry approached its annual February low point. The largest share of the loss in services payrolls occurred among private schools, where nonteaching staff were on furlough for the mid-term recess at some colleges and universities, and in the business services category which was down seasonally. A larger-than-normal number of hires in the personal services industry and the return to work of strikers in the legal services industry tempered the services downturn. The bulk of the decline in the public sector was centered in local education, which like the private education sector, was furloughing nonteaching personnel between semesters. The transportation and public utilities (-7,600), finance, insurance, and real estate (-2,700), and mining (-400) industry divisions reported less notable seasonal job reductions.

The manufacturing sector's job level fell 17,700 in January 1983 -- about 12,000 less than normal for this time of year. Because many factories were already at minimal operating staff levels, seasonal cutbacks were lower than usual this year. The factory job count was at its lowest level since January 1939.

Anticipated layoffs among nondurable goods components (-11,400) accounted for nearly two-thirds of the factory job cutbacks. A large part of the soft goods payroll reduction was in the apparel industry (-3,600) with job losses in nearly every category but heaviest in the women's outerwear category. Other notable job losses occurred in the miscellaneous manufacturing (-2,200), textile (-1,700), food (-1,000), and printing and publishing (-1,000) industries. The largest share of the drop in miscellaneous manufacturing occurred in the jewelry, silverware and plated ware industry and the costume jewelry and notions making industry. Job cutbacks among knitting mill workers dominated the reduction in textile employment, while half of the loss in food payrolls was centered in the canning industry. The majority of the decrease in printing and publishing jobs occurred in the commercial printing and newspaper segments. The only soft foods component to register a higher job level was the rubber and plastics products industry, up because of increased business in the plastics segment.

The durable goods job level declined 6,300 in January, as employment contracted seasonally in nearly every component industry, except primary metals (+300). Unexpected hiring among iron and steel foundries highlighted the primary metals job advance. Nearly half of the hard goods job reduction occurred in the nonelectrical machinery (-1,700) and stone, clay, glass, and concrete (-1,300) industries. Payroll cutbacks in the engine and turbine, and industrial machinery industries accounted for the largest share of the drop in nonelectrical machinery employment. The decline in stone, clay, glass, and concrete jobs could be traced to layoffs in the concrete, gypsum, and plaster segment. Other notable job losses were registered by the transportation equipment (-1,000) and electrical machinery (-900) industries. Layoffs stemming from a slowdown in demand for motor vehicle parts and accessories caused the drop in transportation equipment jobs, while the loss in electrical machinery employment was shared by most of the components in the industry.

Since January 1982, the state has lost 46,800 nonfarm jobs, with the manufacturing sector accounting for 72,600, or all of the nonagricultural employment downturn.

ANNUAL REVISIONS OF NONFARM EMPLOYMENT ESTIMATES NEW YORK STATE, NEW YORK COMBINED AREA, NEW YORK CITY AND UPSTATE AREAS BY INDUSTRY, 1981-1982

MONTHLY estimates of wage and salary workers in nonfarm establishments in New York State, the New York Combined Area, New York City, Westchester, Rockland, Nassau-Suffolk and the upstate areas by industry for the years 1981-1982 presented on pages 5 to 54 reflect the annual revisions to the 1982 benchmark. These estimates supersede those previously published for 1981 and 1982 in the January 1982 through December 1982 issues of the *Employment Review*.

Employment estimates are adjusted to reflect revisions in the benchmarks of the covered and noncovered segments of the nonagricultural employment series. Employment estimates for establishments covered by the New York State Unemployment Law were adjusted to employment levels through 1982. Employment estimates for the noncovered sector such as interstate railroads, nonprofit religious, charitable, scientific, social and educational organizations and portions of government were adjusted based upon the latest information made available through the U.S. Bureau of Labor Statistics and other governmental agencies.

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for December 1982 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
254	Partitions and fixtures	$273.22	39.2	$6.97
385	Opthalmic goods	283.53	39.0	7.27
231	Men's & boys' suits, coats & overcoats	252.62	34.7	-
234	Women's, children's, infants' undergarments	182.58	34.0	5.37

[3] Represents the number of checks issued regardless of funding source to individuals in: State departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

(See page i for explanation of data)

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative Federal-State program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "Balance of State" (State less New York City). In these areas, a series of factors are applied to administrative statistics from State unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "Balance of State" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past 4 weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1981 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

[1] Subarea of New York City Area.

[2] Combination of New York City Area and Nassau-Suffolk Area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the Office of Statistical Standards, Bureau of the Budget, Executive Office of the President. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles.* SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the State. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the State, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and Federal, State, and Local Government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Labor News Memorandum.** Bi-weekly. Newsletter of State and general labor information including bi-weekly strike data, projections of employment and wage data for industries and occupations important in this State.

10. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

11. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

EMPLOYMENT STATISTICS REPORTS

12. **Employment Statistics, Volume 1.** This report contains data on monthly nonfarm employment by industry in New York State from 1939 to 1949. It also contains data on hours and earnings of production workers in manufacturing industries in the State from 1947 to 1949. June 1966.

13. **Employment Statistics, Volume 2.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1959 to 1965. June 1966.

14. **Employment Statistics, Volume 3.** This report contains monthly nonfarm employment data for New York State and New York City from 1950 to 1960 and for the State's industrial areas from 1951 to 1960. It also contains monthly data on hours and earnings of production workers in manufacturing for New York State and New York City from 1950 to 1960. April 1967.

15. **Employment Statistics, Volume 3, Supplement.** Completes the presentations of nonfarm employment, hours and earnings data for the years 1947 to 1960 for the industrial areas of the State. July 1968.

18. **Employment Statistics, Volume 6.** This report contains monthly civilian work force data for 1958 to 1965 for the State, industrial areas and selected counties. Included also are annual averages for nonfarm industries not published monthly for 1958 to 1965 and monthly nonfarm employment and hours and earnings data for 1961 to 1965 for the State and industrial areas. September 1970.

19. **Employment Statistics, Volume 7.** This report contains insured employment by industry in the 10 largest counties in the State for the years 1960 to 1969. October 1970.

20. **Employment Statistics, Volume 8.** This report provides comprehensive data on the age, industry and annual earnings by sex and color of wage and salary workers in employment covered by Old-Age, Survivors, Disability and Health Insurance (OASDHI) in New York State for the years 1959 to 1965. January 1971.

21. **Employment Statistics, Volume 9.** This report contains monthly labor turnover rates in manufacturing industries in New York State and Industrial Areas, 1966-1970. November 1972.

22. **Employment Statistics, Volume 10.** This report is a continuation of *Employment Statistics, Volume 6*. It contains monthly civilian work force data for 1966-1970 for the State, major areas and selected counties. Included also are monthly nonfarm employment and earnings and hours data and annual averages for nonfarm industries and not published monthly for 1966-1970 for the State and major areas. August 1973.

23. **Employment Statistics, Volume 11.** This report contains data on annual employment, payrolls and earnings by industry of employees covered by unemployment insurance for the State, industrial areas and counties from 1968-1973. March 1975.

24. **Employment Statistics, Volume 12.** This report contains monthly labor turnover rates in manufacturing industries in New York State and industrial areas from 1974-1977. Data for the New York City Area cover 1972-1977. December 1978.

SPECIAL REPORTS

30. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

31. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

32. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

33. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the State. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in Federal and State legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the State (in 1976) who worked in industries covered by this report.

B-PUBLICATIONS--Continued

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the State, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public Information, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, State and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

- 78-3 Albany-Schenectady-Troy Area
- 78-6 Binghamton Area
- 78-5 Buffalo Area
- 78-1 Nassau-Suffolk Area
- 78-2 New York City
- 78-7 Rochester Area
- 78-8 Syracuse Area
- 78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

MONTH IN REVIEW
February 1983

Civilian Labor Force

The number of employed New York State residents increased 16,000 from January 1983 to 7,164,000 in February 1983. However, compared with February 1982, the current resident employment level was down 152,000.

Joblessness in the state was virtually unchanged between January and February 1983, edging downwards 1,000 to 754,000. Since February 1982, the number of persons seeking work has risen 32,000.

The state's rate of unemployment in February 1983 improved slightly from a month ago, declining 0.1 of a percentage point to 9.5 percent.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) totaled 7,100,400 in February 1983, or 11,900 higher than the January 1983 figure. This increase, which was 14,200 less than the average January-February upturn for the past five years, reflected below-normal hiring and continuing cutbacks resulting from a weakened economy.

Over the month, manufacturing employment rose by 6,300--about 4,900 less than the usual pace for this time of year. Nondurable goods job gains were below normal (+9,000) but still outweighed recession-related durable goods job losses (-2,600). Anticipated recalls in the apparel industry (+7,900) accounted for most of the advance in soft goods employment. Job increases in the women's outerwear category highlighted the employment expansion in the apparel industry. Smaller seasonal gains were registered by the textile (+1,100), miscellaneous manufacturing (+1,100), and leather (+800) industries. Hiring in the knit outerwear category accounted for the rise in textile payrolls, while job additions in the toy-making industry led the upturn in miscellaneous manufacturing employment. The job gain in the leather industry was below average, although the increase was spread throughout the industry. The paper products (-500), chemical (-500), and printing and publishing (-400) industries all experienced job cutbacks resulting from reduced business. The decline in paper products employment reflected, in part, a strike in the converted paper and paperboard industry. The only other soft goods loss occurred in the food industry (-500), which was down seasonally.

Large scale incentives for early retirement, coupled with lack of new orders, prompted the decline in hard goods jobs. Attrition-related job reductions were primarily responsible for the large decrease in the historically robust instruments, photo and optical goods industry (-2,300). The nonelectrical machinery (-1,300) and electrical machinery (-200) industries both cut back jobs as new orders declined. Seasonal influences led to a loss of 400 jobs in the stone, clay, glass, and concrete industry. Job gains in the transportation equipment (+1,000), primary metals (+300), and fabricated metals (+200) industries tempered these decreases. Hiring to meet increased demand for motor vehicle parts and accessories caused the upturn in transportation equipment jobs. A modest influx of orders was responsible for the job additions in the primary metals industry. Payroll expansion in the metal forging and stamping industry dominated the gain in fabricated metals employment.

The nonmanufacturing job gain of 5,500 in February 1983 was 9,400 below the normal January-February upturn. Less-than-average seasonal hiring, combined with unexpected cutbacks, was responsible for the comparatively weak job advance. The bulk of the nonmanufacturing payroll gain was centered in the services division (+16,200) and the public sector (+8,600). Most of the growth in services employment occurred among private colleges and universities which were recalling furloughed nonteaching personnel following the mid-year recess, and among membership organizations which were up seasonally. The largest share of the advance in public employment was located in local education, which like its private counterpart, was recalling nonteaching staff at the beginning of the spring semester. The finance, insurance, and real estate industry group (+300) posted a small job gain in the brokerage industry. These increases were softened by job losses in the remaining nonmanufacturing divisions, with the largest declines reported by trade (-10,500) and construction (-7,100). Seasonal cutbacks among retail department stores were the main reason for the downturn in trade employment. Construction payrolls dropped as expected, with most of the reduction contained in the special trade contractor segment. The transportation and public utilities division's job level was down (-2,000) in contrast to prior years, primarily because of layoffs in the air transportation industry and below-normal hiring in the communication industry. Normally, February job gains in the communication industry offset seasonal losses elsewhere in the division.

Over the past 12 months, the state has lost 57,300 nonfarm jobs, with the factory sector down 76,200 jobs--the largest loss among the industry divisions. The only bright spots occurred in the services division, up 29,400 jobs, and in the finance, insurance, and real estate group, up 10,400 jobs over the year.

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1982

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1982

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual,* and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than four reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining, and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton.* Broome and Tioga counties.
--**Buffalo.* Erie and Niagara counties.
--**Nassau-Suffolk.* Nassau and Suffolk counties.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome.* Herkimer and Oneida counties.
-- *Westchester.* Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the new York State Unemployment Insurance Law.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
THIRD QUARTER 1982

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles.* SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

B-PUBLICATIONS--Continued

222. Provisions of Union Agreements in Hospitals and Homes in New York State, 1975. This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. Union Contracts in New York State, Coverage and Characteristics, 1979. Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. The Garment Industry in New York State. A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. Characteristics and Costs of Work Injuries in New York State, 1966-1970. Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. Private Pension Plans in New York State, 1971. Study includes summaries of 279 large private pension plans. Price $3.00.

246. Directory of Employee Organizations in New York State, 1981. This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978. This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance. The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. Prevailing Wage Information for Unemployment Insurance Information. Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980. This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports**.

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, and part-time and temporary employment. Experiences of responding firms with various programs are presented in the report.

MONTH IN REVIEW
March 1983

Civilian Labor Force

Resident employment in New York State rose 88,000 from February 1983 to 7,252,000 in March 1983. Compared with a year ago, the current jobholder level was lower by 117,000.

Total unemployment in the state in March 1983 was 792,000, a gain of 38,000 from a month ago and an increase of 100,000 from a year ago.

The rise in unemployment caused the state's jobless rate to swing upwards by 0.3 of a percentage point from February 1983 to 9.8 percent in March 1983. Since March 1982, the rate of unemployment has increased 1.2 percentage points.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in March added 32,200 jobs to the February 1983 total, bringing the job count to 7,132,600, with nearly all of the expansion in the nonmanufacturing sector. This gain was more the 13,000 below the average February-March upturn over the past four years -- the shortfall could be traced to cautious seasonal hiring, early retirements and recession-related cutbacks.

Nonmanufacturing payrolls were up 31,300 between February and March 1983 -- well below the usual pace for this time of year. Approximately 60 percent of the nonmanufacturing increase occurred in the services (+10,800) and trade (+8,100) industry divisions. The rise in services payrolls was shared by nearly all of its components, with over two-thirds of the job expansion occurring in health services, amusement and recreational services, and business services. Hiring by restaurants and retail apparel stores in anticipation of the Easter shopping season accounted for most of the staff buildup in trade. Seasonal influences were also responsible for the employment increases among the remaining nonfactory groups. The approach of milder weather triggered the upswing in construction activity (+6,000), while staff additions in local education accounted for most of the boost in government jobs (+5,200). The finance, insurance, and real estate group posted a small gain (+2,400), primarily because of payroll expansion in the brokerage and real estate industries. Except for services, all of the above industry divisions experienced below-normal February-March job gains. The only nonmanufacturing industry group to show an over-the-month employment loss was the transportation and public utilities group (-1,400), down largely because of job cutbacks in the communications and air transportation industries.

Manufacturing employment inched upwards 900 in March 1983 as weak nondurable goods job growth barely outweighed payroll losses in the durable goods segment. Normally, factory payrolls increase substantially from February to March because of seasonal growth in nondurable goods jobs.

Nondurable goods employers in March added 3,200 jobs to their February payrolls -- about 2,600 less than the average February-March gains over the past four years. Although the apparel industry (+2,800) dominated the job additions among the soft goods components, its gain was relatively mild. The tempering effect of contraseasonal job losses in the chemical (-600) and printing and publishing (-100) industries, plus greater than normal cutbacks in the food industry (-1,000), also contributed to the poor showing in soft goods jobs. Lack of product demand led to the layoffs in these industries. The job gains among the remaining soft goods industries followed, in large part, normal seasonal patterns, except for hiring due to a pickup in product demand in the miscellaneous manufacturing industry (+700) and below-normal hiring in the textile industry (+400). The paper industry (+200) registered a small gain because of the return to work of strikers in the paperboard industry.

The durable goods segment, which lost 2,400 jobs over the month, was dominated by induced attrition in the historically robust instruments, photo and optical goods industry (-3,200). Employment in this industry has been declining in recent months as employers have reduced operating costs by offering early retirement incentives to employees. The fabricated metals industry reported a notable job decline (-500) in response to slowed business activity. Job gains in the majority of the remaining hard goods components tempered these losses. The most significant gains occurred in the lumber (+400) and electrical machinery (+400) industries. These industries, which normally show little job level change in April, were both enjoying increased product demand.

Since March 1982, the state's nonfarm job count has declined 65,100, with the manufacturing sector accounting for 78,000 or all of the reduction. Among the industry divisions, the only significant over-the-year improvement occurred in the services (+29,700) and finance, insurance, and real estate (+9,500) groups.

[1] Unemployed as percent of combined total of employed and unemployed.

1982 IN REVIEW

Vincent F. DeSantis, John P. Wong and
Roger W. Gerby

Civilian Labor Force

The state's civilian labor force, although reaching a record high, grew by only 3,000 in 1982 as unemployment increased and employment declined. For the third time in four years, 8 million or more New York residents were in the labor force.

Total employment contracted 72,000 to 7,339,000 from 1981 to 1982, the lowest level since 1978, a year of employment expansion. The number of residents with jobs in 1982 was 445,000 higher than the average for 1975 and 1976 when New York State was in a period of sharp economic decline.

In 1982, the number of jobless state residents rose sharply by 74,000 to 687,000 -- the highest level in five years. Unemployment has risen each year since 1979. The jump in 1982, although steep, was moderate if compared to the increase of 245,000 between 1974 and 1975.

The unemployment rate for the state rose to 8.6 percent in 1982, a full percentage point above the 1981 average and the highest since 1977 (9.1 percent). In 1977, the state was still adjusting from the effects of the 1973-1975 recession. The annual average jobless rate compared unfavorably with recent years. For each year from 1978 to 1981, the jobless rate averaged between 7.0 and 8.0 percent: a 7.7 percent average in 1978, a 7.1 average in 1979, 7.5 in 1980, and 7.6 in 1981.

While a substantial increase occurred in the overall unemployment rate, the percentage of unemployed among some demographic groups actually declined. The jobless rate for blacks fell 0.9 of a percentage point, from 14.7 percent in 1981 to 13.8 percent in 1982. The unemployment rate for whites, meanwhile, reached 7.8 percent in 1982, up 1.2 percentage points from 1981. At the same time, labor force participation on the part of whites decreased 0.4 of a percentage point to 59.6 percent. The decline in labor force participation on the part of blacks was more severe, a drop of 1.7 percentage points to 57.1 percent. The decline in the unemployment rate of black persons reflected less participation in the labor force and not an increase in employment.

Both Sexes, 16-19 Years

In 1982, the unemployment rate for teenagers (16-19 years of age) already high, inched upward by 0.5 of a percentage point to 22.4 percent. The labor force participation rate, particularly among black youth, declined.

Men and Women

From 1981 to 1982, the jobless rate for men jumped 1.1 percentage points to 8.5 percent, while the jobless rate for women climbed 0.8 of a percentage point to 8.7 percent. Participation in the labor force declined for both sexes, but more so for women.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) averaged 7,234,100 in 1982, down 53,200 jobs from 1981 -- the first year-to-year job loss since 1976. Large manufacturing job cutbacks overshadowed modest nonmanufacturing job gains. Factory job losses were the most numerous since the severe cutbacks that occurred between 1974 and 1975 when the economy was also mixed in a recession.

Employment in the nonmanufacturing sector increased 18,300 from 1981 to an annual average of 5,872,300 in 1982, another record high. The 1982 advance, however, was roughly one-fifth as large as the average gain from 1976 to 1981. Three nonmanufacturing industry divisions increased in employment between 1981 and 1982 while three decreased. Job gains in the services division were the largest (+32,000), followed by finance, insurance, and real estate (+15,600). The growth in services employment was only one half that of recent years. The employment gain in finance, insurance, and real estate was in line with recent experience. Construction expansion (+600) lagged far behind its annual increase for the last five years.

Trade (wholesale and retail combined) was the biggest nonmanufacturing job loser (-11,400), followed by government (-10,600), and transportation and public utilities (-7,800). In the last five years, jobs increased in

Table 2. NEW YORK STATE NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT BY INDUSTRY ANNUAL AVERAGES, 1982 AND 1981

(In thousands)

Industry	1982	1981
Total nonagricultural employment	7,234.1	7,287.3
Manufacturing	1,361.8	1,433.3
Durable goods	701.2	741.9
Nondurable goods	660.6	691.4
Mining	6.4	6.4
Construction	213.8	213.2
Transportation and public utilities	421.9	429.7
Wholesale and retail trade	1,454.3	1,465.7
Finance, insurance and real estate	670.5	654.9
Services	1,815.8	1,783.8
Government	1,289.7	1,300.3

NOTE: Estimates are based on the 1982 CES benchmark.

Table 3. CHANGE IN NUMBER OF JOBS BY INDUSTRY NEW YORK STATE, 1981-1982 AND 1976-1981 AVERAGE CHANGE

(In thousands)

Industry	1981-1982	1976-1981 change
Total nonagricultural employment	-53.2	+99.6
Manufacturing	-71.5	-1.1
Durable goods	-40.7	+6.9
Nondurable goods	-30.8	-8.1
Mining	0.0	-0.1
Construction	+0.6	+4.8
Transportation and public utilities	-7.8	+0.3
Wholesale and retail trade	-11.4	+10.3
Finance, insurance and real estate	+15.6	+15.9
Services	+32.0	+64.2
Government	-10.6	+5.3

each of these divisions, although barely so in transportation and public utilities. The number of mining jobs was unchanged between 1981 and 1982. (See Table 3).

The manufacturing sector's job count, at 1,361,800 in 1982, was down 71,500 from 1981. This loss represented a rapid acceleration in factory job erosion due to the national recession and fundamental changes in the nation's and state's competitive position in many manufacturing industries. The losses were shared by the durable goods segment (-40,700) and the nondurable goods segment (-30,800). Employment in all durable goods industries declined, excluding the historically robust instruments and related products industry. Job losses were heaviest in primary metals (-9,900), nonelectrical machinery (-9,800), transportation equipment (-7,700), fabricated metal products (-6,700), and electrical machinery (-5,000).

Among nondurable goods industries, employment increased slightly in two industries and decreased in all others between 1981 and 1982. Job cutbacks were most severe in apparel (-8,600), food (-4,300), miscellaneous manufacturing (-3,800), textile (-3,300), chemicals (-3,100), and rubber and plastics (-3,000). Tobacco (+100) and printing and publishing (+400) were the only nondurable goods industries with job gains.

Seasonally Adjusted Nonfarm Employment

With the influence of seasonal factors removed, nonfarm employment decreased from one month to the next in nearly all of 1982. Seasonally adjusted nonfarm employment was 7,204,800 in December 1982 or 62,600 below the January 1982 level of 7,267,400.

Unemployment Insurance Beneficiaries

A total of $1,374 million was paid to jobless workers in New York State in 1982 under a variety of unemployment assistance programs. A year earlier, these benefits totaled $1,090 million. In an average week of 1982, approximately 320,000 persons were collecting benefits under these programs, compared with 272,000 in 1981.

These programs provided up to a total of 34 weeks of jobless benefits during 1982 as described below:

- The New York State Unemployment Insurance Law provides for payment of up to 26 weeks of regular benefits to eligible jobless workers. These benefits are paid from the state Unemployment Insurance Fund, which is financed by contributions from New York employers. In 1982, $1,211 million in benefits was paid to jobless workers under this program, compared with $944 million in 1981.

- Standby legislation under the Unemployment Insurance Law provides for the payment of an additional 13 weeks of extended benefits during periods of high insured unemployment to persons who have used up the basic 26-week allowance. This program "triggered" on in July 1980 and "triggered" off in January 1981 based on the national "trigger" computation. There were no extended benefits in 1982. Payments under this program, for the most part financed one-half by the state Unemployment Fund and one-half by the federal government, amounted to $27 million in 1981 and $115 million in 1980.

- The federal Tax Equity and Fiscal Responsibility Act of 1982 created a Federal Supplemental Compensation Program (FSC). This program provides supplemental benefits after exhaustion of regular state benefits (and extended benefits, when payable -- 100 percent federally financed -- giving a claimant ten, eight or six additional weeks of benefits depending upon the insured unemployment rate (IUR) in the state. In New York, benefits were limited to eight or six additional weeks. Benefits which first became payable for the week of unemployment beginning September 13, 1982 amounted to $94 million during 1982.

- There are programs that provide unemployment benefits to persons who worked for the federal government or were in the Armed Forces in the 52 weeks before initiating cliams. These benefits are fully-financed by the federal government. Payments to ex-servicemen totaled $3 million in 1982 compared with $16 million the previous year. Former federal employees received $10 million in unemployment benefits in 1982 and $14 million in 1981.

Hours and Earnings

In 1982, the average weekly wage of New Yorkers covered by unemployment insurance in the private wage and salary sector was $357.15,[1] up $27.75 or 8.4 percent from 1981. Production workers in manufacturing earned an average weekly wage of $323.98 in 1982, an increase of $15.08 from 1981. The average number of hours worked per week by factory production workers in 1982 was 38.8, or 0.6 of an hour less than in 1981. Average hourly earnings of production workers in 1982 was $8.35, which was $0.51 higher than in 1981.

---

[1] Preliminary estimate.

Major Labor Areas

Resident employment declined in 10 out of 12 of the state's major labor areas during 1982. On an annual average basis, the largest employment losses from 1981 to 1982 occurred in the 8-county New York City area, down 25,400 (-0.8 percent) and the Buffalo area, down 24,700 (-4.9 percent). The job losses in these two areas accounted for 70 percent of the statewide downturn in employment. The two major labor areas where the number of resident jobholders increased over the year were the Nassau-Suffolk area, up 11,900 (+1.0 percent) and the Poughkeepsie area, up 2,500 (+2.4 percent).

Every major labor area had a higher level of unemployment in 1982 than in 1981. Approximately two-thirds of the statewide upturn in joblessness occurred in the 8-county New York City area, up 20,700 (+6.8 percent); the Buffalo area, up 16,200 (+30.3 percent); the Long Island area, up 7,000 (+9.0 percent); and the Rochester area, up 6,700 (+24.2 percent).

The rise in joblessness among workers in the major labor areas resulted in higher unemployment rates in 1982. The Buffalo area again posted the highest rate of unemployment in the state, averaging 12.6 percent in 1982, up 3.1 percentage points from 1981. This was followed by the Elmira area, at 11.5 percent, up 3.7 percentage points; the Glens Falls area, at 9.6 percent, up 1.2 percentage points; and the Utica-Rome area, at 9.0 percent, up 1.4 percentage points. The Poughkeepsie area recorded the lowest unemployment rate, 5.9 percent, up 0.3 of a percentage point.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the State and City which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.[1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.[2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

B-PUBLICATIONS--Continued

222. Provisions of Union Agreements in Hospitals and Homes in New York State, 1975. This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. Union Contracts in New York State, Coverage and Characteristics, 1979. Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. The Garment Industry in New York State. A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. Characteristics and Costs of Work Injuries in New York State, 1966-1970. Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. Private Pension Plans in New York State, 1971. Study includes summaries of 279 large private pension plans. Price $3.00.

246. Directory of Employee Organizations in New York State, 1981. This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978. This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment, effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance. The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. Prevailing Wage Information for Unemployment Insurance Information. Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980. This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

LABOR RESEARCH REPORTS--Continued

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, and/part-time and temporary employment. Experiences of responding firms with various programs are presented in the report.

EMPLOYMENT REVIEW

APRIL 1983
VOL. 36 NO. 4

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Louis Schisa, Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
April 1983

Civilian Labor Force

Resident employment in New York State edged upwards 3,000 from March 1983 to 7,255,000 in April 1983. Compared with a year ago, the number of New Yorkers with jobs was lower by 96,000.

Total unemployment in the state was 714,000 in April 1983, a decline of 78,000 from a month ago, but an increase of 94,000 from a year ago.

The rate of unemployment in the state fell sharply between March and April 1983, dropping 0.8 of a percentage point to 9.0 percent. Nevertheless, the April 1983 rate was 1.2 percentage points higher than a year ago.

Nonfarm Employment

The nonagricultutal wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 39,600 from March 1983 to 7,172,200 in April 1983 because of seasonal hiring by nonmanufacturing employers. However, this gain was almost 18,000 below the normal pace for this time of year.

The nonmanufacturing job level was 40,900 higher in April as compared with March 1983 -- far less than the usual March-April upturn. Below-seasonal expansion by most industry divisions, coupled with a drop in government employment, accounted for the shortfall. Trade (+16,500), the only industry division that met seasonal expectations, posted the largest gain, with nearly all of the job expansion in the retail category. Hiring was particularly brisk among restaurants. Payroll additions in the construction (+13,000) and services (+10,200) groups followed this increase. The gain in construction jobs was the third smallest April advance in 25 years as the spring buildup was affected by lingering winter weather and continuing rain. The services division was led by an upturn in the agricultural services and amusement and recreational services industries. The finance, insurance, and real estate (+2,600) and the transportation and public utilities (+500) groups also registered less-than-normal gains. The public sector (-2,000) was the only nonmanufacturing industry division to lose employment over the month. The bulk of the government job reduction occurred in the local education segment, reflecting short furloughs of unsalaried personnel because of spring recess and the discretionary use of "snow-days" by school districts.

Manufacturing employment in April declined 1,300 from a month ago as seasonal cutbacks among nondurable goods outweighed a below-normal upturn in durable goods jobs. A sharper-than-usual drop in apparel jobs (-2,700) dominated the payroll loss in soft goods employment (-1,700). The largest share of the apparel downturn occurred in the women's outerwear category. Another payroll reduction, primarily seasonal, occurred in the printing and publishing industry (-500). Job increases in the majority of the remaining soft goods industries tempered these decreases. The large advance in miscellaneous manufacturing employment (+600) was located in the toy-making segment.

The less-than-normal increase in durable goods employment (+400) could be traced to the tempering effect of contraseasonal job losses in the primary metals (-600) and nonelectrical machinery (-600) industries. Payroll cutbacks at a blast furnace and rolling and finishing mill, coupled with a strike in a nonferrous metals plant, accounted for a large portion of the drop in primary metals jobs. Layoffs resulting from a slackening in business activity in the special machinery industry were the main reason for the downturn in nonelectrical machinery jobs. Highlighting the hard goods industries, which reported higher job levels over the month, were the stone, clay, glass and concrete industry (+800), up seasonally, and the transportation equipment industry (+800), which was bolstering its staff to meet increased demand for motor vehicles and motor vehicle parts products.

The state's nonagricultural wage and salary job count in April 1983 was down 45,700 from the year-ago level. Heavy durable goods losses accounted for the largest share of the nonfarm job downturn.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

(Not seasonally adjusted)

Area	Employed (in 000's)			Unemployed (in 000's)			Rate of unemployment [1]		
	Apr. 1983	Mar. 1983 (r)	Apr. 1982 (r)	Apr. 1983	Mar. 1983 (r)	Apr. 1982 (r)	Apr. 1983	Mar. 1983 (r)	Apr. 1982 (r)

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for March 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
254	Partitions and fixtures	$271.04	39.8	$6.81
357	Office, computing and accounting machines	375.16	41.5	9.04
201	Meat products	373.43	41.4	9.02
203	Preserved fruits and vegetables	289.67	39.9	7.26
391	Jewelry, silverware and plated ware	334.36	38.3	8.73

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

(See page i for explanation of data)

SIC Code	Industry	Average weekly hours		Average weekly overtime hours		Overtime hours as percent of total hours	
		Apr. 1983	Apr. 1982	Apr. 1983	Apr. 1982	Apr. 1983	Apr. 1982

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--*Albany-Schenectady-Troy Area. Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--*Binghamton Area. Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--*Buffalo Area. Erie and Niagara counties.
--*Elmira Area. Chemung County.
--*Glens Falls Area. Warren and Washington counties.
-- Monroe Area. Monroe County.
--*Nassau-Suffolk Area. Nassau and Suffolk counties.
--*Newburgh-Middletown Area. Orange County.
-- New York City. Bronx, Kings, New York, Queens and Richmond counties. [1]
-- New York City Area. Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--*Poughkeepsie Area. Dutchess County.
--*Rochester Area. Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- Rockland Area. Rockland County.
--*Syracuse Area. Madison, Onondaga and Oswego counties.
--*Utica-Rome Area. Herkimer and Oneida counties.
-- Westchester Area. Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Report 15 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

15. **High-Technology Industries in NYS.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

B-PUBLICATIONS--Continued

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports**.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Information.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, and/part-time and temporary employment. Experiences of responding firms with various programs are presented in the report.

EMPLOYMENT REVIEW

MAY 1983
VOL. 36 NO. 5

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
May 1983

Civilian Labor Force

The level of employment among New York State residents dropped 55,000 from April 1983 to 7,200,000 in May 1983. Compared with a year ago, the current number of employed residents was lower by 199,000.

Total unemployment in the state was 669,000 in May 1983, a decline of 45,000 from a month ago, but an increase of 36,000 from a year ago.

The rate of unemployment among New Yorkers fell 0.5 of a percentage point from April 1983 to 8.5 percent in May 1983. Since May 1982, the jobless rate has risen 0.6 of a percentage point.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 48,000 between April and May 1983 to 7,220,200, primarily because of normal spring hiring in the nonmanufacturing sector. The nonfarm job upturn was in line with the average April-May increase for the last two years, but was considerably below the average for the last five years.

Nonmanufacturing payrolls in May 1983 were 46,300 higher than a month ago as all industry divisions increased seasonally. Over one-third of the nonfactory job expansion occurred in trade (+17,600), with hiring among restaurants accounting for the bulk of the advance. The construction (+13,000), government (+6,100), and services (+4,700) groups reported large payroll gains. The advent of warm weather triggered the upturn in construction activity, with the special trade contractor category responsible for half of the employment rise. Most of the increase in public employment occurred in local education as payrolls among school districts rebounded following the spring recess. Hiring in the hotel and motel, and recreational and amusement services industries led the upsurge in services employment. The remaining nonfactory divisions reported smaller seasonal job gains -- transportation and public utilities (+2,900), finance, insurance and real estate (+1,700), and mining (+100).

Largely because of additional durable goods jobs, manufacturing payrolls increased 1,700 in May 1983. However, both hard and soft goods segments experienced below-normal job growth for this time of year.

Job gains in the primary metals industry (+700) highlighted the advance in hard goods payrolls (+1,100). The upturn in primary metals employment was caused by job growth in the blast furnace industry and the return to work of strikers in the nonferrous metals industry. The majority of the remaining hard goods components experienced moderate seasonal gains. The only notable job loss occurred in the fabricated metals industry (-200), down because of a strike against a structural metal products plant.

Nondurable goods employment inched upward 600 this May in contrast to substantial gains in recent years. Most of the shortfall was attributable to job losses in the apparel industry (-300). Normally, there is a substantial job growth in May apparel jobs, but cutbacks in the women's outerwear category this year caused a decline. Layoffs in the chemical industry (-400) stemming from general sluggishness in business activity also contributed toward the below-normal rise in soft goods employment.

The largest job gains in the nondurable goods industries were reported by the textile (+900) and food (+300) industries. Seasonal hiring in knitting mills accounted for most of the staff expansion in textiles, while the increase in food employment was spread throughout the industry.

Since May 1982, the state has lost 55,600 nonfarm jobs, with the largest portion of the over-the-year loss in durable goods jobs.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for April 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
203	Preserved fruits and vegetables	$290.03	39.3	$7.38
231	Men's & boys' suits, coats & overcoats	254.88	35.4	7.20

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for April 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
275	Commercial printing	$489.72	37.7	$12.99

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles.* SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Report 15 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

15. **High-Technology Industries in NYS.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

B-PUBLICATIONS--Continued

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

EMPLOYMENT REVIEW

JUNE 1983
VOL. 36 NO. 6

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
June 1983

Civilian Labor Force

The number of New York State residents with jobs increased 259,000 from May 1983 to 7,459,000 in June 1983, or 19,000 higher than the resident employment level recorded 12 months ago.

Unemployment in the state totaled 750,000 in June 1983, a gain of 81,000 from a month ago and an increase of 55,000 from a year ago.

The rise in unemployment caused the state's jobless rate to jump 0.6 of a percentage point between May and June 1983 to 9.1 percent. Since June 1982, the unemployment rate has risen 0.6 of a percentage point.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) rose 44,300 from May 1983 to 7,264,500 in June 1983, primarily the result of seasonal influences. Job additions in the nonmanufacturing sector accounted for 75 percent of the nonfarm upturn. However, the May-June 1983 payroll advance was well-below the average gain (62,600) for the last five years.

Nonmanufacturing payrolls increased 33,300 between May and June 1983, or 12,200 short of the comparable average gain over the last five years. A large portion of the shortfall could be traced to the public sector and the transportation and public utilities group. Government employment, which normally shows a moderate increase in June, fell 3,400. The decline occurred because of budget-related cutbacks and early retirements in state government in addition to seasonal layoffs of hourly personnel in the state university system, and local community colleges and public schools. A labor-management dispute in the utilities industry tempered the rise in transportation and public utilities jobs (+1,500). The nonmanufacturing job expansion that did occur was led by staff expansion in trade (+14,400), particularly in the restaurant and food store portions of the industry. Favorable weather prompted the payroll growth in the construction indutry (+8,600) -- the special trade contractor segment accounted for over half of the job advance. These job additions were followed by gains in the services (+6,200) and finance, insurance, and real estate (+6,000) industry divisions. The seasonal rise in services employment was augmented by the return to work of strikers in the health services and amusement and recreational services categories. Hiring in the finance and real estate portions accounted for the employment advance in the finance, insurance, and real estate division.

Manufacturing employment expanded 11,000 in June 1983, but was constrained for this time of year because of limited summer hires and was reminiscent of increases in factory employment during periods of slowed business activity. Both hard and soft goods segments experienced reduced seasonal hiring. The nondurable goods industry group added 6,100 jobs in June, with the largest advances registered by the apparel (+2,000) and food (+1,200) industries. Hires in the women's outerwear industry dominated the gain in apparel jobs, while the rise in food payrolls was distributed throughout the industry. Smaller increases, mainly seasonal, occurred among the remaining soft goods industries, except for the tobacco industry, which remained unchanged.

Durable goods payrolls increased 4,900 between May and June, with the bulk of the expansion concentrated in the electrical machinery (+2,200) and nonelectrical machinery (+1,600) industries. Job hikes in the communication equipment and electronic component industries led the rise in electrical machinery employment, while hiring in the office, computing and accounting industry dominated the nonelectrical machinery job advance. The only hard goods components that lost jobs over the month were the instruments, photo and optical goods industry (-800) and the primary metals industry (-300). The loss in instruments jobs was a continuation of permanent layoffs and induced attrition, which began in early 1983; particularly hard-hit was the photographic industry, which has cut back over 6,000 jobs since January of this year. Nearly all of the decline in primary metals jobs could be traced to payroll decreases in the blast furnace industry.

Since June 1982, the state's nonfarm job level has fallen 55,800, primarily because of losses in the factory sector.

Table 1. EMPLOYED, UNEMPLOYED AND RATE OF UNEMPLOYMENT BY PLACE OF RESIDENCE NEW YORK STATE AND MAJOR LABOR AREAS

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for May 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
332	Iron and steel foundries	$522.54	43.4	$12.04
234	Women's, children's, infants' undergarments	193.31	-	-
239	Miscellaneous fabricated textile products	196.51	-	5.34
	Hotels (year-round)	234.26	31.7	7.39

[3] Represents the number of checks issued regardless of funding source to individuals in state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment, and estimates of the number and characteristics of the disadvantaged and other individuals in need of manpower services. Compiled on a fiscal year basis for the state, each major labor area and selected CETA prime sponsor areas.
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

SPECIAL REPORTS

Special Report 15 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

11. **The Jobseeker: A Source Book for Youth in New York State.** This report for young people entering the labor market describes types of industries, occupations, and employers; gives suggestions on interviewing and writing resumes; tell where to get job information; profiles 120 occupations. December 1980.

12. **A Guide to Career and Occupational Information.** A listing of over 200 books, pamphlets, newsletters and other major references compiled to assist jobseeker, counselors, and occupational planners and others concerned with career choices and planning. Occupational supply and demand, education and training, and vocational planning are among the categories covered. January 1980.

13. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

14. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

15. **High-Technology Industries in NYS.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209 above), published in 1976.

B-PUBLICATIONS--Continued

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

219. **Occupational Projections, 1974-1985, New York State.** This report provides projections of occupational manpower requirements for the state. For major areas, see **Occupational Projections** under **Labor Research Reports.**

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

Occupational Projections, 1974-1985, for Major Labor Areas of the State. These reports provide projections of occupational manpower requirements for the major labor areas of New York State. For New York State occupational projections, see B-219.

78-3 Albany-Schenectady-Troy Area
78-6 Binghamton Area
78-5 Buffalo Area
78-1 Nassau-Suffolk Area
78-2 New York City
78-7 Rochester Area
78-8 Syracuse Area
78-9 Utica-Rome Area

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

EMPLOYMENT REVIEW

JULY 1983
VOL. 36 NO. 7

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
July 1983

Civilian Labor Force

Resident employment in New York State rose sharply to 7,676,000 in July 1983, up 217,000 from June and 125,000 from July 1982.

Total unemployment in the state declined 18,000 between June and July 1983 to 732,000. The number of jobseekers in July 1983 was 32,000 greater than in July 1982.

The decline in unemployment, coupled with the increase in employment, caused the state's rate of unemployment to drop 0.4 of a percentage point from June 1983 to 8.7 percent in July 1983. The July 1983 rate was 0.2 of a percentage point higher than the rate registered 12 months ago.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) declined 63,400 from June to 7,201,100 in July 1983, with 72 percent of the job reduction in the nonmanufacturing sector. The nonfarm downturn reflected seasonal retrenchment among the industry divisions, and a labor-management dispute in the electric utilities industry. After adjustments were made for this work stoppage, the June-July 1983 drop in nonfarm payrolls was about 5,500 smaller than the average June-July loss of 52,500 over the last five years.

Nonmanufacturing payrolls fell by 45,800 in July 1983, with the largest decreases occurring in the transportation and public utilities industry group (-24,600) and in the public sector (-20,700). Two-thirds of the loss in transportation and public utilities jobs involved a strike against a downstate utilities firm. The extensive downsizing in the government work force was caused by end-of-school year layoffs of nonsalaried personnel in local and state education, which more than offset limited hires of summer youth by local government agencies. In recent years, funds for the summer youth programs have been cutback. The only other nonfactory job reduction was reported by the trade division (-16,000), most noticeably in the restaurant and retail apparel categories. Gains in services (+7,800), finance, insurance, and real estate (+3,900), and construction (+3,500) jobs softened these losses. The majority of the services industries shared in the upturn, particularly the hotel, motel, trailer camp, and amusement and recreation services categories. Summer layoffs of nonteaching personnel among private schools tempered this gain. Nearly all segments of the finance, insurance, and real estate group registered higher job levels in July, while the construction industry continued to approach its August employment peak.

In July 1983, employment in manufacturing declined 17,500, approximately half of the usual over-the-month reduction in jobs for this time of year. The normally large job decrease failed to occur because the extended business downturn had already taken its toll on factory payrolls, leaving many firms with a minimum number of production workers.

Nondurable goods payrolls accounted for nearly three-quarters of the factory decline, dropping 12,800 between June and July. Job losses in the apparel industry (-7,800), particularly in the women's outerwear category, dominated the soft goods downturn. The textile (-1,600), leather (-1,500), and miscellaneous manufacturing (-1,300) industries also reported large seasonal cutbacks. Most of the decrease in textile jobs occurred in the knitting mill segment, while the drop in leather payrolls was shared nearly equally by all of its components. All portions of the miscellaneous manufacturing industry showed over-the-month job losses. The food industry (+1,600) was the only soft goods industry to experience a higher job level, with the canning component responsible for most of the job expansion.

Durable goods employers cut 4,800 jobs from their payrolls in July, largely reflecting unpaid summer furloughs. There were fewer furloughs, however, than in the summers of previous years. With the exception of the nonelectrical machinery industry, where the job level remained unchanged, all hard goods components showed lower job counts from a month ago. The electrical machinery (-1,400) and fabricated metals (-1,000) industries registered the largest job decreases, accounting for half of the hard goods downturn. The instruments, photographic and optical goods industry (-400) continued to trim its work force, especially in the photographic segment.

Over the past 12 months, the state's nonfarm payroll count has fallen 50,500, with the largest share of the deficit in the durable goods segment (-40,800) of manufacturing.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles.* SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

B-PUBLICATIONS--Continued

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.
